Exclusively from Offshore Handling Systems and designed to be extra-tough for those situations that could cause a standard pole to bend or even break. They pipe catcher comes fitted with a super-strong marine grade aluminium shaft.

APPLICATIONS

Assist in the safe hands free operations involved in the Manoeuvring of suspended drill pipes and pipes ranging in diameters from 2″ to 13″.

HOW TO USE

- Always where correct PPE when using Pipe Catcher.

- Always take instruction from Banksman, Driller or winch operator.

- Always be aware of swing loads and plan escape route.

- For open ended pipe connection, adjust noose opening to required diameter by using wire release mechanism on top of tool. Using fore fingers pull cap end back and noose wire will travel down aluminium pole which in turn will increase noose opening.

- Insert open ended pipe into noose. Pull wire back from top of tool to close and tighten around pipe.

- Manoeuvre load to desired position.

- Activate instant release handle on upper part to release noose.

- For enclosed pipe. Activate instant release handle on upper part to release noose. Install around pipe. Reinstate noose connection on tool top and pull tension on wire to tighten around pipe. Activate instant release mechanism once desired pipe position has been achieved.

- Always store tool in clean dry location when not in use.

PLEASE NOTE: This tool not designed to be used for leveraging activities.   Prices and availability on request.   CE
